

## Driller

[Apply Now](#)

Company: Indianinkuwait

Location: Kuwait City

Category: construction-and-extraction

Verify positions and depth of boring locations before drilling to determine if it is safe to move forward with the process.

Check gauges, monitor drilling condition and pay close attention to equipment to decide if it needs to be altered or adjusted during drilling.

Use knowledge of soil or rock conditions to determine which drill is appropriate for each job.

Stop, start and control machine drilling speed and align as well as position drills to stabilize machines.

Regulate downward pressure, rotary speed and air pressure, depending on the type of material the drill is moving through, changing procedures and settings for each individual job as needed.
