

## ELECTROMECHANICAL ENGINEER

[Apply Now](#)

Company: Ace International

Location: Kuwait

Category: other-general

1. Perform with subcontractors and General Contractor to oversee IBA equipment installation.
2. Ensure to complete installation needs as stated by site management.
3. Design and develop products and systems like cables, connectors and penetrates.
4. Prepare guidelines and procedures to develop company products as per specifications and schedules using safest and cost-effective processes.
5. Research and evaluate data for customer design proposal, parameters and manuals to identify design and application feasibility.
6. Develop and maintain relations with other departments for optimum product development focusing toward product standardization.
7. Direct and coordinate installation of fabrication activities to ensure systems and products comply with electro-mechanical engineering design along with customer specifications.
8. Review and approve electro-mechanical engineering designs before manufacture to ensure design review conformance and repetitive errors elimination.
9. Provide technical assistance to clients and company's representatives.
10. Interact with motor design engineer and chief engineer to utilize engineering data for defining and developing design concepts to attain client requirements.
11. Develop preliminary, final as well as working layouts related to elector-mechanical engineering.
12. Estimate engineering time and complete dimensional studies of projects.
13. Perform calculations, qualify, analyze and test units.

14. Evaluate, interpret and execute commercial, military and customer specifications for materials, processes and finishes.
15. Interact with customers, vendors and other outside representatives on specific matters related with product design.
16. Confer with production, test, purchasing and sales to discuss existing or potential engineering projects and products.
17. Confer with management, production, sales and purchasing staff to determine engineering feasibility, cost effectiveness and customer demand for new and existing products.
18. Direct and coordinate manufacturing support, documentation, and testing activities to ensure compliance with specifications, and customer requirements.
19. Perform detailed calculations to compute and establish manufacturing specifications.
20. Prepare and communicate specifications for purchase of materials and equipment/tooling when necessary.
21. Examine, prepare and verify technical drawings and specifications of electrical systems, to ensure that installation and operations conform to standards and customer requirements. May draft detailed multi-view drawings of assemblies and sub assemblies.
